

Final Assignment

1. Apply some data analysis methods to your data set and find something interesting.
 - Specifications of your data set
 - Description of employed methods
 - Outcomes, modes of failure, possible improvement, etc.
2. Final evaluation of this course: For example,
 - What were interesting/useful
 - What were not, and how should they be improved
 - Anything else you want to tell me.
3. Deadline: July 29 (Fri), 2005
 - E-mail to sugi@cs.titech.ac.jp
 - Drop into Sugiyama's Mail box at W8E building.
