

CANON ELECTRONICS INC.

A Commitment to the Corporate Philosophy of Kyosei-Living and Working together for Common Good

As our society of free enterprise changes, so do the companies comprising it. A world leader in technology, Canon has reached the "fourth stage" of its development. This implies the responsibility to become a global corporation in the full meaning of the term and to behave as an outstanding corporate citizen of the countries in which we operate. We are following two paths toward these goals, as described below.

Businesses

Development, production, and sales of precision machines and instruments, electric and electronic machines and instruments; information devices; software for computers and communications devices,

Misato Plant

PRODUCTS

Document Management

The needs to document management challenges will become increasingly pressing as companies and other organizations strive to share information internally and to communicate it effectively to others. At Canon Electronics, IMS has matured beyond conventional microfilm equipment to embrace advanced digital

Handy Terminal

A powerful, robust mobile terminal GT-10/11 series with a built-in printer. A robust, slim mobile terminal GT-1 series with various communication features.
