

東京消防庁
TOKYO FIRE DEPARTMENT

LIFE SAFETY LEARNING CENTER

1F

Earthquake Simulation Section

You can enhance your ability to enhance emergency by experiencing simulated earthquakes. In addition, measures against earthquakes are presented on the three televisions equipped here.

Smoke Maze Section Fire Fighting Training Section

You can learn about the nature of smoke generated by fire and know the best way to escape from thick smoke. You can also develop proper judgment and the ability to take effective action against disasters such as fires.

In this section, you can shoot water and “extinguish” a fire on a screen. Let’s learn how to use fire extinguishers and standpipes.

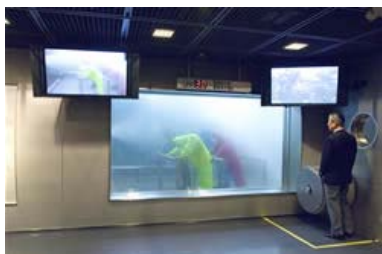

2F

First Aid Training Room

3F

Rainstorm Simulation Section

Here, you can learn how to protect yourself from a rainstorm by experiencing simulated devastating winds and torrential rains

4F

3-D Theater

A powerful three-D effect is created in this theater with a projector, a stereophonic sound system and vibrating seats functioning together. Images on screen make you feel exactly like you are struck by an earthquake! JOLT! What would you do?... What could be done? It's you who will take action next!!
