Aquatic Environmental Science

Outline #2: Present state of aquatic environment

1. Environmental Science
 - What is science?
 - Science and technology for environmental management
2. Present state of aquatic environment
 - Water Environmental Problems in 21st century
 - Global and local
3. Physical property of water
 - Water molecule
 - Phase
 - Density
 - Physical structure of water
4. Characteristics of aquatic environment
 - Water
 - Flow
 - Open
 - Dynamic
 - High diversity
