

Lecture Review

Yesterday, we discussed the goals for the second quarter. In this, I have asked you to work on generating a simplified English version of your graduation thesis (or newer research) for submission to a conference. Therefore, all further class periods will be focused on completing this project. In particular, you are to use the weekly lecture periods for writing your submission, asking grammar and style questions, and collaborative work with other members of the class.

2nd Quarter Project

By 10 August you are to submit to me a ZIP file containing the necessary LaTeX, BiBTeX, and other files, that will allow me to compile a PDF of your submission. This PDF should be ready for submission at this time. As such, all English grammar and spelling, along with all formatting and other issues should be completed before 10 August.

Please note the above is only part of your 2nd quarter work. I am also going to have you complete whatever edits are necessary on your 11 June poster submission.

(If you have any problems accessing the above websites or videos, please let me know).
