## Aquatic Environmental Science

### Outline #2: Present State of Aquatic Environment

1. Importance of Aquatic Environment
    - Scientific and engineering viewpoints
    - Discussion
  2. Present State of Aquatic Environment
    - Water environmental problems in 21st century
    - Global and local
  3. Physical Property of Water
    - Water molecule
    - Phase
    - Density
    - Physical structure of water
  4. Science and Engineering for Environmental Management
-
