

Congratulations, Welcome TokyoTech. I am Kaneko in charge of the class.

5th May is first class. We try to use two online systems to share information and group work through the internet.

(1) Confirm your TokyoTech email account

I check registration list of the class, some students have not activate TokyoTech email account. Please register required information to activate your TokyoTech email account. We, staff will contact to your TokyoTech email account. (Not by gmail etc.)

(2)Install Zoom

Please install Zoom application into your laptop or smart phone before the class starts. If you can only use smart phone at online lecture, you must check setting of your Zoom account. You need to change default setting not to use telecommunication but to connect only to WIFI.

You sign in Zoom account.

Tap Setting Icon (right-bottom of screen)

Tap Meeting in the Menu list

Change Audio automatic connection to Use the internet.

You had better check this process before you start meeting.

(3)Access to OCW-i system

As other procedure you need, through TokyoTech Portal, by you student id number and password, enter into TokyoTech web system.

You can access to the OCW-i, that students enrolled into the course see course materials.

When you produce exercise and report.

Note: OCW is to provide course information to the public.

以上
